HIGH QUALITY HYDRANT AT LOWEST COST

The R. D. Wood Standard Swivel Joint Hydrant with or without breakable flange and stem coupling

The R. D. Wood Standard Swivel Joint Hydrant is designed to provide maximum strength and reliability at lowest possible cost. Internal friction, which can lower pressure, is reduced to the minimum, well below A.W.W.A. specifications. Changes of diameter are carefully rounded and nozzleways are scientifically tapered.

All Bronze Stuffing Box

Sound and simple in construction. It cannot rust or corrode. Hydrant operating thread can be greased or oiled by unscrewing one small plug.

Extension Piece

Can be inserted between hydrant head and barrel or between barrel and elbow. Installation does not require shutting off water supply.

Breakable Flange and Stem Coupling

Available at slight additional cost are this specially designed flange in the standpipe and a frangible coupling in the hydrant stem. A heavy blow that would ordinarily break the hydrant will snap the ring in the flange and the coupling in the stem. Both can be replaced quickly and inexpensively. No digging is necessary.

Available with standard types of pipe connections—bell, *mechanical joint*, flange, universal or screw.

R. D. WOOD COMPANY

Public Ledger Building, Independence Square, Philadelphia 5, Pa.

Manufacturers of "Sand-Spun" Pipe (centrifugally cast in sand molds) and R. D. Wood Gate Valves

List of Members.....	1
Geographic Distribution.....	184
Summary of Membership.....	222
List of Advertisers.....	46a

This 1956 edition of the AWWA Directory contains the membership list, corrected through Jun. 30, 1956. In accordance with the policy of annual publication, another Directory will be published in 1957, and will contain a list of new members for the intervening year, as well as such editorial material as a water works buyers' guide, procedural and historical information about AWWA, and other features. The next *full* membership list will appear in the succeeding Directory, in 1958. (The two Directory sections appear in alternate years—the membership lists in the even-numbered years; the other reference matter in the odd years.)

*Copyright © 1956 by the American Water Works Association, Inc.
as Part 2 of Journal AWWA, Vol. 48, No. 10*

AMERICAN WATER WORKS ASSOCIATION, INC.
2 Park Avenue **New York 16, N.Y.**

The list beginning on the facing page includes AWWA members of all grades—Honorary, Life, Active, Corporate, Associate, and Junior—and also the Affiliates and the Municipal Service Subscribers. A geographic breakdown of the membership is given beginning on page 184.

The date when the member joined the Association is cited in each listing. Active and Life Members are designated only by the date; for example: (Jul. '39). Corporate, Associate, and Junior Members are shown in the following manner: (Corp. M. Jul. '39), (Assoc. M. Jul. '39), (Jr. M. Jul. '39). Affiliates and Municipal Service Subscribers are shown by: (Affil. Jul. '39) and (Munic. Sv. Sub. Jul. '39). (Note: By action of the Board of Directors, Affiliate Membership is discontinued as of Jan. 1, 1957.)

National offices held by members are cited according to the years of the conventions during which the members served. Thus, for example, a member taking office the last day of the 1948 convention and serving until the last day of the 1949 conference will be listed as "Vice-Pres. '49." Awards and Honorary Memberships are shown by the year of the convention at which they were presented. Members enrolled in one or more of the Association's four Divisions—Water Works Management Division, Water Resources Division, Water Purification Division, and Water Distribution Division—are designated by *M*, *R*, *P*, and *D*, respectively.

This Directory is not for sale. It is distributed to members of all grades for their use as members of the Association and is not to be placed in the hands of any nonmembers to be used as the basis of personal or mail promotion or solicitation.

Officers of the Association and its Sections or Divisions may obtain addressed labels from the membership list without charge if the application for such list is made in writing by the person requesting it and the use to which the name list is to be put is clearly stated and shown to be in conformance with the conditions laid down in the paragraph above.

Any member of the Association may purchase a set of addressed labels or cards by depositing with the Secretary an amount designated by him to cover labor and material, and by recording the exact use to be made of the list. If the designated use to which the list is to be put is not in accord with the intent of the first paragraph herein, the Secretary will not make the list available to the applicant.

LIST OF MEMBERS

Members registered in the Water Works Management Division are indicated by "M"; in the Water Resources Division by "R"; in the Water Purification Division by "P"; and in the Transmission and Distribution Division by "D."

- Aalto, Johan A.**, Dist. Engr., Catskill Watersheds, New York City Dept. of Water Supply, Box 6 Uptown, Kingston, N.Y. (Jul. '49) *MR*
- Abbey, B. C.**, City Clerk, Box 218, Pascagoula, Miss. (Oct. '55)
- Abbey, Robert J.**, Mgr., Lewistown Orchards Irrigation Dist., 1520 Powers Ave., Lewistown, Idaho (Apr. '54) *MPD*
- Abbotsford, Corp. of**, Thomas M. Irvine, Abbotsford, B.C. (Corp. M. Jan. '54) *MRP*
- Abbott, Carroll B.**, Pres., Water Works Supply Co., Monadnock Bldg., 681 Market St., San Francisco, Calif. (May '22) *Life M.*
- Abbott, Frank A.**, Director of Public Works, Water Dept., City Hill, Camden, N.J. (Jan. '45) *P*
- Abbott, George A.**, Chief of Plants, Board of Water & Elec. Light Comrs., Box 570, Lansing 3, Mich. (Jan. '53) *MRP*
- Abbott, Wayne H., Jr.**, Supt., Landel Metropolitan Dist., 3100 Alpha St., Lansing 9, Mich. (Jan. '52) *MD*
- Abbott, Wells O., Jr.**, Civ. Engr. Asst., Dept. of Water & Power, 207 S. Broadway, Los Angeles 54, Calif. (Apr. '54) *D*
- Abell, D. S.**, Chief, Environmental Health Div., Butler County Health Dept., 426 N. Main St., Butler, Pa. (Nov. '32) *RPD*
- Aberley, Richard C.**, Civ. Engr., Brown & Coldwell, 66 Mint St., San Francisco, Calif. (Jul. '55) *PD*
- Abilene, City of**, Carl L. Nicolay, City Mgr., City Hall, Abilene, Kan. (Corp. M. Jan. '52) *MD*
- Abouzaghla, Fouad I.**, Asst. Director of Work, Ministry of Municipality & Rural Affairs, 15 Eksheed St. Roda, Cairo, Egypt (July '55) *RPD*
- Abplanalp, C. C.**, Div. Mgr., Wallace & Tiernan Inc., 1229 W. Washington Blvd., Chicago 7, Ill. (Mar. '31) *P*
- Abplanalp, Glen Harold**, Prin. Engr., Havens and Emerson, 233 Broadway, New York 7, N.Y. (Jan. '54) *MRPD*
- Abraham, Charles P.**, Supt. & Engr., Bureau of Water, Municipal Bldg., Lancaster, Pa. (May '30) *MRPD*
- Abraham, Melvin H.**, Supt., Water Dept., 1642-119th St., Whiting, Ind. (Jul. '55) *MPD*
- Abrahams, John Duval**, Supt., Water Production, 316 W. 20th St., Sanford, Fla. (Jan. '56) *RP*
- Abrams, Norman H.**, Sales Mgr., Southwestern Dist., Badger Meter Mfg. Co., 1023 N. 34th St., Waco, Tex. (Oct. '39)
- Abrams, Philip**, Civ. Engr., James M. Montgomery, 15 N. Oakland, Pasadena 1, Calif. (Oct. '50) *MRPD*
- Abramson, Martin**, Assoc. Utilities Engr., State Public Utilities Com., State Bldg., Civic Center, San Francisco, Calif. (Apr. '53) *MPD*
- Ace Pipe Cleaning, Inc.**, Arthur Shapiro, Pres., 3513 E. 18th St., Kansas City 27, Mo. (Assoc. M. Apr. '55)
- Acebes, Lucien**, Pres., Harbor Oaks Improvement Assn. Inc., Box 449, Port Orange, Fla. (Abl. Jul. '55) *MP*
- Acevedo-Quintana, F.**, Cons. San. Engr., Edificio Araure 202, Calle Real-Sabana Grande, Oficina 204, Caracas, Venezuela (Jan. '41) *PD*
- Ackerman, G. D.**, Director, Public Service, Water Dept., City Hall, Xenia, Ohio (Jan. '48) *MRD*
- Ackerman, Theodore V.**, San. Engr., Water Dept., 319 City Hall, Pasadena 1, Calif. (Jul. '47) *P*
- Ackermann, William C.**, Chief, State Water Survey, Box 232, Urbana, Ill. (Apr. '56) *R*
- Acree, John E.**, Supervising Engr., Water Dept., The Empire Dist. Elec. Co., Aurora, Mo. (July '53) *MD*
- Adair, Duncan L.**, Supt., Public Works, 28 Pearl St., Sidney, N.Y. (Jan. '50) *MP*
- Adair, Robin** (Miss); see Ontario Hydro-Electric Power Com.
- Adam, William D.**, Dist. Mgr., Suffolk County Water Authority, 120 W. Broadway, Port Jefferson, N.Y. (Oct. '45) *M*
- Adams, C. Donald**; see San Antonio (Calif.) Water Co.
- Adams, C. V.**, City Mgr., Box 372, Fairburn, Ga. (Oct. '55)
- Adams, Charles M.**, Project Engr., American Pipe & Constr. Co., Box 3428 Terminal Annex, Los Angeles 54, Calif. (Jan. '55) *MR*
- Adams, Clarence D.**, Cons. Chem. Engr., Box 307, New Albany, Ind. (Jan. '35) *P*
- Adams, E. B.**, Supt., Water Works, Albany, Ga. (Jan. '49)
- Adams, Edward F.**, Chief Chem. Engr., Plastic Pipe Div., Triangle Conduit & Cable Co., Triangle & Jersey Aves., New Brunswick, N.J. (Jan. '54) *MRPD*

TO THE ENDS OF THE EARTH...

From Canada to South Africa—
from the Pacific Ocean to the Near East—
Lock Joint Concrete Pressure Pipe
continues unfailingly to bring life-giving water
to cities, farms and industries.

Engineers and water works officials
of many countries have shopped the world and, like
so many of their fellow experts in the United States,
have chosen Lock Joint Concrete Pressure Pipe
as the most durable, dependable and
economical medium for the construction of their
vital water supply and distribution lines.

You cannot do better than to follow
their example and specify LOCK JOINT.

LOCK JOINT PIPE CO.

East Orange, New Jersey

Sales Offices: Chicago, Ill. • Columbia, S. C. • Denver, Col. • Detroit, Mich. • Hartford, Conn. • Kansas City, Mo.

NEW SIMPLEX FILTER RATE CONTROLLER GIVES YOU COMPLETELY PNEUMATIC CONTROL!

**Amazing Modulair® Controller
responds fast...closes tight**

Here's proof that the new Simplex Modulair Filter Rate Controller responds instantly to changes in filter head, holds flow at desired rate...automatically! In chart from Modulair installation No. 2, head changes from 4' to 7' while rate forms almost perfect circle at the set 275,000 gpd.

How Modulair works! Pipe-like casting with annular Venturi throat houses streamlined inner body with corded-rubber modulator (black) that expands and retracts pneumatically to control flow. When head is low at start of run, modulator expands automatically to hold flow at set rate.

As filter head loss rises, flow tends to decrease... and change the Venturi differential. Sensitive Modulair compensates by instantly retracting the pneumatic modulator, maintaining a constant head-loss value through the combined filter and controller, automatically keeping flow at set rate!

Compact . . . easily installed Modulair is only two to three pipe diameters long! It fits wherever a piece of pipe can fit . . . in any position, horizontal or vertical . . . simplifying pipe gallery layout. High-grade, cast iron Modulair comes in 4" to 24" standard pipe sizes with corrosion-resisting fittings. Cord-inserted rubber throttling element that's as tough as a truck tire has given 30 years' wear in accelerated life-tests.

Accuracy! In 4 years of field performance, Modulair charts show an accuracy in filter control that exceeds today's most exacting demands. This high degree of control extends for wide ranges of head loss and flow rates, including complete, tight shut-off! And there's no drift at end of run.

Longer filter runs! Modulair combines a low head-loss, annular Venturi measuring element with a streamlined throttling element. This new design offers so little resistance to flow that you get longer filter runs, big savings in wash water!

Minimize maintenance! With Modulair's new design, there's no place for air to accumulate . . . no place for sand to lodge and interfere with accuracy. Throttling element, the only moving part inside pipeline, is non-corrosive rubber. Pneumatic poise element is simple, rugged. There are

no line valves, no pilot valves, no pistons, no valve shafts, no stuffing boxes to pack!

Lower first cost! Modulair's low head loss means lower operating head requirements . . . permits vertical compression in plant design and lower costs in plant construction.

Completely pneumatic! No intermediate hydraulic steps! No pilot valves! No hydraulic cylinders! Air loading pressure is applied *directly* to the flow controlling element.

Automatic filter operation! Modulair works with control systems of any type to give you remote rate control or master pneumatic control that's fully automatic.

Technical bulletin! For full details on Modulair, write for Bulletin 950. Simplex Valve & Meter Company, Dept. JA-13, 7 East Orange Street, Lancaster, Penna.

PIPE LINE EQUIPMENT

A SPACE STATION . . . a thousand miles high in the stratosphere slowly circling the globe . . . observers near its rim studying cloud formations and the earth's atmospheric conditions below . . . this may be our weather bureau of the future.

100 years from now...A MAN-MADE "MOON" MAY BE OUR WEATHER BUREAU

OUR WORLD of tomorrow will bring many changes. But in one vital aspect of American living, your great-grandchildren will continue to enjoy the same dependability and service you know today. *Cast iron pipe laid today will still carry water and gas to their homes.*

Today, over sixty American cities and towns are still served by cast iron water and gas mains laid 100 and more years ago. And modernized cast iron pipe, centrifugally cast, is even stronger, tougher, more durable.

U. S. Pipe is proud to be one of the leaders in a forward-looking industry whose service to the world is measured in centuries.

United States Pipe and Foundry Company

FIRE HYDRANTS

FLOOR STAND INDICATOR

THE MARKET PLACE FOR QUALITY VALVES

The consolidation of two great valve companies with a combined experience of more than 165 years devoted primarily to the manufacture of water works valves and hydrants now provides the most extensive market place in the industry.

A.W.W.A. VALVES AND HYDRANTS: with several types of each to choose from with a complete line of valve ends in every size required and backed by the combined engineering, manufacturing and application resources of both companies.

LARGE AND SPECIAL VALVES FOR LOW AND HIGH PRESSURE SERVICE: up to 72", fabricated with the most modern foundry and machine shop equipment, recently expanded.

SQUARE BOTTOM VALVES: from 4 to 48", designed and built to stand up under the severe conditions of automatic operation, throttling and constant opening and closing.

13

THE
LUDLOW

VALVE MFG. CO., INC. TROY, N.Y.

GATE VALVES • FIRE HYDRANTS • SQUARE BOTTOM VALVES
CHECK VALVES • TAPPING SLEEVES • AIR RELEASE VALVES

ACCESSORIES: Where experience counts most—the selection of by-passes, automatic, electric or hydraulic operation and countless highly special equipment for the pumping plant.

TAPPING SLEEVES AND VALVES: up to 48", that insure speed, safety and low costs when cutting valves into the lines.

CHECK VALVES: insure against slam on pump shut-downs. Clearway-quiet closing, single disc. Sizes up to 30" with or without lever arm and spring.

AIR VALVES: a combined air-and-vacuum and air release valve that allows air to escape when filling the lines and air to prevent vacuum when emptying. Also used on air tanks, booster bowls and turbine pump discharge.

SERVICE: The names Ludlow and Rensselaer mean the same today that they have during your lifetime. The desire to serve the Water Works Field in person—in research and design and in prompt delivery of original equipment and spare parts for all products has not changed. On the other hand, our ability to serve has at least doubled.

Bulletins available on all equipment, replacement parts and accessories.

THE REX VERTI-FLO works like magic in cutting high settling costs

The amazing ability of Rex Verti-Flo Clarifiers to reduce costs... assure clearer effluent... increase over-all plant efficiency... is almost magical. Actually the Verti-Flo design *divides* a horizontal-flow settling tank into a series of smaller, vertical-flow cells.

These Verti-Flo users are getting increased efficiency... lower costs... clearer effluent

Fairmont, Minn.	Sweet Home, Oregon
U. S. Penitentiary,	Fort Wayne, Indiana
McNeil Island, Wash.	Bellevue, Wash.
Ashland, Oregon	Washington
Roseburg, Oregon	Water Power Co.
Kansas State	Clarkston, Wash.
Penitentiary,	
Lansing, Kansas	Somerset, Penn.
Corvallis, Oregon	Federal Reformatory
Florence, Oregon	for Women
Valencia, Venezuela	Alderson, W. Va.

What does this unique design mean? It means more tank capacity—up to *four* times more than conventional settling tanks. In existing tanks, Verti-Flo will at least double your present capacity. In new construction, Verti-Flo® saves on both construction and equipment costs since you can plan for smaller tanks. Detention times are from one-fourth to one-half those required in conventional tanks and yet you get an effluent of maximum clarity.

Whether you specify equipment or operate a plant, you should know the facts about Rex Verti-Flo. Why not have the advantages of Rex® Verti-Flo in your plant? For complete details, mail the coupon today for your copy of Bulletin 52-77. You'll be happy you did.

MUELLER®

Corporation Stop with compression joint inlet designed specifically for thin wall or small diameter main.

CORPORATION STOPS for any main

A complete line of Corporation Stops with a broad combination of inlet and outlet threads makes it possible to tie into any type main. Mueller Corporation Stops are manufactured of the highest quality water works bronze, field proved by years of satisfactory service. Key and body are precision machined and key is individually lapped into the body assuring full contact around ports with no leakage. Stop is carefully inspected and air tested under water - all exposed threads are covered for shipment. All Mueller Corporation Stops can be inserted in the main under pressure with the Mueller "B" or "A-2" Tapping Machines.

Check with your Mueller Representative or write direct for information on the complete line of Mueller Corporation Stops.

**NEW**

V-notch Chlorinators **SIMPLIFY Chlorination**

With the new Wallace & Tiernan V-notch Variable-Orifice Chlorinators:

OPERATION IS SIMPLIFIED as one injector control starts or stops the unit. Chlorine gas is turned on or off automatically.

SETTING FEED RATE IS SIMPLIFIED as one control sets feed rate precisely at both high or low feeds.

INSTALLATION IS SIMPLIFIED as units are shipped ready for operation. No water supply is needed at the chlorinator. A remote injector uses only standard water supply fittings.

MAINTENANCE IS SIMPLIFIED and virtually eliminated. All parts are corrosion resistant, mounted in an attractive modern cabinet.

For full details on manual or automatic proportional V-notch Chlorinators, contact your W&T representative, or write to the address below.

Allis-Chalmers **PUMPS** Solve a Water Works Problem

Newly installed Allis-Chalmers horizontal high-lift, 5215-gpm, 220-ft head pump, driven by 350-hp, 1170-rpm Allis-Chalmers motor, replaces old Allis-Chalmers pump-motor combination.

This new Allis-Chalmers vertical pump, rated 5215 gpm at 55-ft head and driven by a 100-hp, 1170-rpm induction motor, pumps raw water out of Lake Michigan into the filter beds.

Waukegan Increases Capacity, Modernizes Plant . . . Again Specifies Allis-Chalmers

Although pumps, motors, control and switchgear, installed in 1928, were still giving dependable, economical service, need for increased capacity indicated replacement of some equipment at the Waukegan (Ill.) Water Works.

The first step in modernizing the plant was to replace two of the original 16 pumping units, one vertical and one horizontal. This included new Allis-Chalmers pumps with increased capacity, new motors, and new control.

Allis-Chalmers Builds the World's Largest Range of Equipment for the Public Works

Pumps; motors, *Texrope* drives, control; switchgear, substations, transformers; butterfly valves; steam turbine-generator units, condensers, hydraulic turbines and generators, engine-generator units; blowers, compressors, vacuum pumps; dryers, screens, mills, sifters; tractors, graders, scrapers, motor wagons, power units.

Texrope is an Allis-Chalmers trademark.

**GENERAL
CHEMICAL
"ALUM"**

**...FIRST
CHOICE**

**For
Crystal-
Clear
Water!**

Here's the alum of unvarying quality and uniformity . . . a highly efficient, dependable and economical coagulant for removing turbidity from water, for reducing tastes, odors, colors. Water men, America over, prefer General Chemical Aluminum Sulfate for making water good to drink and crystal clear. Make it your choice, too!

Your Most Dependable Supplier—
General Chemical has 25 Aluminum Sulfate plants strategically located across the country. This means a source of supply you can always count on in your daily operations . . . in emergencies. Take advantage of it!

For Water Treatment

- Produces crystal clear water
- Gives better floc formation
- Promotes better settling and longer filter runs
- Has no chlorine demand
- Aids in reduction of tastes and odors
- Is a low cost coagulant
- Superior in tests against other coagulants
- High in quality. Its constant uniformity can be depended upon

For Sewage Treatment

- Clean, easy to handle
- Dry feeds well or dissolves readily for solution feeding; liquid alum also available in many areas
- Simple application. Requires only low-cost feeding apparatus and minimum attention
- Clear, colorless effluents are possible
- Sludge digests readily
- Treated digested sludge dries quickly with minimum of odor
- Chlorine consumption is cut, due to lower demand of clarified sewage
- Economical to use

**For installation savings
and performance too!**

TRANSITE PRESSURE PIPE with the Ring-Tite Coupling

**goes together fast,
locks tight . . . automatically!**

Water works engineers have found that with Transite® Pressure Pipe and the Ring-Tite® Coupling, installed costs are lower, performance is higher. Contractors can install it faster, and once installed, it maintains its high flow capacity year after year . . . keeps pumping costs low . . . may mean smaller pipe size to start.

Both Transite Pressure Pipe and Ring-Tite Coupling are made of asbestos-cement. Strong and durable, this material cannot rust, is highly resistant to corrosion, will not tuberculate.

With Ring-Tite, installed costs are less—assembly follows the digger closely. The special coupling design permits quick, easy alignment. To assemble, rubber rings are simply popped into grooves. Then lubricated pipe-ends slide in under the rings easily, smoothly, and surely.

Pipe ends stop positively and are positioned accurately—with ends automatically separated within the coupling. This gives the line flexibility to withstand shock and vibration, relieves line stresses, permits conformance to curves.

For further information on Transite Pressure Pipe and the Ring-Tite Coupling, write for TR-160A.

Crews can install Transite Pressure Pipe as fast as the trench is opened. This means less time on job . . . lower installation costs.

Ring-Tite Fittings, too—You can join Transite Pipe directly to fittings, valves and hydrants embodying the Ring-Tite design . . . no special tools needed, no poured joints.

Palatable Water Means Good Public Relations

The severest critic of the palatability of a water supply can be the casual visitor—tourist or salesman, because he can compare your supply with that of other communities. Ill-tasting water can also influence industries against settling in your town. Every water works official should strive to satisfy the severest critic, thereby, pleasing the local consumers as well. Adequate usage of Nuchar activated carbon will assure delivery of a palatable water at all times, so that when your local consumers go travelling, they will return with that wonderful feeling—"There's no place like home."

AQUA NUCHAR ACTIVATED CARBON'S adsorptive ability covers a wide range of taste- and odor-producing bodies. John R. Baylis has stated "All tastes and odors likely to be present in a water supply can be removed with activated carbon. We find a few statements in the literature on water treatment that the taste or odor was not removed by the addition of carbon, but almost invariably the reason was that not enough carbon was used."

YOUR BEST INVESTMENT FOR WATER LINES: Steel Pipe . . . Protected by Bitumastic 70-B AWWA Enamel

Steel pipe lined and coated with coal-tar enamel is a combination that's hard to beat for long-life and economy in water service. The spun lining of Bitumastic® 70-B AWWA Enamel, approximately 3/32" thick, gives a waterproof coating that provides the longest life free of tuberculation, incrustation and corrosion. Steel pipe with a spun Bitumastic lining has the highest carrying capacity of any type of water pipe, and assures maximum delivery at minimum cost.

Take advantage of these economies—
Specify steel pipe lined and coated with
Bitumastic 70-B AWWA Enamel.

TRIDENT METERS

EARN MORE

...*COST LESS*

It takes money to maintain the water supply your community expects. It's vitally important to make sure all the water pumped is paid for . . . by using accurate meters . . . and by keeping these meters in good repair.

Trident meters are built to hold accuracy longer, so you receive all the revenue you should. They're built to be easier to repair, so your shop time and expenses are cut down. They're designed so that the newest parts fit the oldest meters . . . simplifying your repair

parts problem, helping you to get accurate, thoroughly modern performance from your oldest meters.

For more than 50 years, Neptune has built fine meters designed to earn more and cost less. Many 50-year-old Tridents are still in service . . . perhaps in your own community . . . living proof that the Tridents you buy today will be a credit to your water system for many long years to come.

M. B. SKINNER CO.

Repair Clamps and Saddles for Steel and Cast Iron Pipe

South Bend, Ind.

Established 1898

SKINNER-SEAL EMERGENCY PIPE CLAMP

For stopping leaks in water mains or pipe lines—instantly, permanently. The standard pipe repair

the world over. Makes a tremendous saving over the old method of repairing leaks, as one man can apply it in ten minutes' time. Made of malleable iron; hinged along one side, with electro-plated steel bolts on the other. Bolt nuts always accessible from above. A gasket completes the clamp. Comes in both cast iron main and steel pipe sizes. Write for discount. Sizes: $\frac{1}{2}$ "-12" for both steel and cast iron pipe.

SKINNER-SEAL PIPE LINE CLAMP

The same principle as an Emergency Pipe Clamp, but about double the length. Especially valuable on splits, or cases of extended corrosion. Like the Emergency Pipe Clamp, it is made of malleable iron, is hinged along one side and provided with electro-plated tightening bolts. Tremendously rugged and strong. Economical in first cost and in installation because one man can apply it quickly and easily. An absolutely permanent repair. Write for discount.

Sizes: $\frac{1}{4}$ "-6" C.I. for both steel and cast iron pipe.

SKINNER-SEAL BELL JOINT CLAMP

For stopping bell and spigot leaks permanently, under pressure. The only clamp with the following features: (1) The large soft gasket is completely SEALED—by Monel band at top, by hard gasket tip at rear. (2) Clamp is equipped with patented distortion-proof anchor ring (3) is completely adjustable to all variations in both pipe and bell sizes, (4) is made of malleable iron and equipped with $\frac{3}{4}$ " electro-plated steel bolts.

Sizes: 2" to 42". Net prices. Write for complete schedule.

SKINNER-SEAL SPLIT COUPLING CLAMP

For repairing clean breaks in cast iron pipe. Two malleable iron rings with intermeshing fingers, drawn together by heavy steel bolts, compress a double-taper soft gasket over the break and permanently shut off the leak. Gasket is completely sealed by Monel band at top and by hard gasket tips at the sides. Applied in 10 minutes. Self-adjusting fit.

Sizes: 2"-24".

Cross Section

SKINNER-SEAL SERVICE SADDLE

For water service connections. Made of malleable iron, with its sturdy design and massive bolt, it is a saddle of the utmost simplicity and strength.

The wide hinge and "web" construction centralizes the pressure on the gasket, while the single, large, accessible bolt not only saves time in application, but gives a uniform seating to the gasket that cannot be obtained by strap saddles with their unequal draw. Not to be confused with single strap saddles. True, we use only one bolt, but the construction of this saddle makes it much stronger than the average strap saddle with two or more straps.

WRITE FOR CATALOG SHOWING OTHER CLAMPS AND SADDLES, AND DRILLING EQUIPMENT

LEOPOLD FILTER BOTTOMS

*Designed to successfully meet
all underdrain requirements*

Made of de-aired fire clay—vitrified and salt glazed, the Leopold Filter Bottom is unequalled for dependable, economical service. The individual blocks resist corrosion, are not subject to tuberculation, and will last indefinitely. Too, they require only small sized gravel, do not need special supporting concrete members, and the Leopold design insures uniform wash distribution.

LEOPOLD Rubber Seated BUTTERFLY VALVES

*Assure positive drop-tight shut-off
easily, efficiently, economically.*

In this design, the seat is of resilient Neoprene rubber or pure gum rubber, vulcanized around a steel ring insert, and held in place by a keeper ring. The steel ring, which is "continuous" to eliminate abnormal wearing, increases the firmness of the seat and assures longer service life.

Whether operated manually or by automatic controls, Leopold Butterfly Valves always provide a positive shut-off that's bubble-tight. Made in sizes 6" to 72".

**THE H & T
POPPET TYPE
MULTIPORT
VALVE**

A masterpiece of workmanship and operating simplicity. Your choice of manual, semi-automatic, or fully automatic.

SERVICE—Many millions of gallons of water are treated daily by equipment using the H & T poppet valve. Over 1,000 are now in use and the number is rapidly increasing. Many of the original valves are now in use for over 10 years.

**MODERNIZING OLD
SOFTENERS AND FILTERS**

If your equipment is too good to discard, yet too old to be efficient or too complicated to operate and control, these units can very often be equipped with H & T poppet type multiport valves — and be made into attractive and efficient water treating units.

95% **Guaranteed Minimum** **MONOLITH SODIUM ALUMINATE**

for water clarification & softening

Only Monolith offers this 95% sodium aluminate with added advantage of correspondingly low insoluble content. Thus Monolith goes farther. A 90% grade is also available.

Monolith quickly forms a dense, rapid settling floc which produces bright effluent ideal for filtering.

Low excess soda gives less susceptibility to caking... gives more feeder and chemical efficiency.

Comparison . . .

A check of the percentage strength you may be using will prove that Monolith and ONLY Monolith offers 95% minimum concentrate.

A New Guide to water works facts and figures

The complete text of "A Survey of Operating Data for Water Works in 1950" combined with "A Statistical Analysis of Water Works Data for 1950" in one handy book. A total of 122 pages of tables and comment reprinted from the June and December 1953 Journal AWWA. In heavy paper binding; \$1.00 postpaid.

American Water Works Assn.
2 Park Ave., New York 16, N. Y.

Are you MOVING ?

Please advise AWWA promptly of any change in your mailing address. Leaving a forwarding address at your old post office is not enough, because postal regulations require periodicals to be returned to the sender if not claimed at the original destination. And, to help us identify you properly, please include your old as well as your new address when writing.

Prompt notification will keep your Journals and other communications coming to you without annoying delays and lapses.

American Water Works Assn.
2 Park Ave., New York 16, N.Y.

WE KNOW VALVES & HYDRANTS

About an egg beater or an A-bomb we know little or nothing. But with valves and hydrants, it's different!

For many years we have been making M&H Valves, Hydrants and accessories on the same basic design — a design originally conceived by applying exhaustive research and careful engineering to practical knowledge of foundry production and water works operation.

As we learned new things during the past, we have made improvements. Our goal has been to make the best valves and hydrants money could buy. So, from year to year our sales have grown. Our company has now become a leading producer of valves and hydrants. And — if and when better valves and hydrants ever are made, we expect them to be M&H.

We know valves and hydrants. For details, write M&H VALVE & FITTINGS COMPANY, Anniston, Alabama.

AWWA WATER RATES MANUAL

The report of the AWWA Committee on Water Rates published in the March 1954 JOURNAL is now available in reprint form as part of the AWWA "Water Rates Manual." Bound in with the report are generous excerpts from such classic publications on the subject of water rates as the Metcalf, Kuichling, and Hawley paper of 1911 on fire protection charges and the reports of NEWWA and AWWA committees chairmanned by Allen Hazen, as well as a table of cost indexes, an outline for allocation of plant and expenses, and other valuable supplementary material.

*here's what
"out of sight
out of mind"
does to a
water main*

"Out of sight—out of mind" can be a mighty expensive philosophy in any water distribution system. The above unretouched photograph proves this point. It shows a badly tuberculated eight inch main whose inside diameter was reduced to an average of almost 4.5 inches. Resultant higher pumping costs with reduced pressure and carrying capacity make it costly to tolerate such conditions. That is why the savings effected in reduced pumping costs frequently pay for the low cost of National water main cleaning.

Since there's never a charge or obligation to inspect your mains, call National now!

Call in National today!

Roberts Filter

means...

MUNICIPAL WATER PURIFICATION

The combined capacity of Roberts-equipped filtration plants is well over 5 billion gallons (5,000,000,000) per day. Regardless of the size of the plant or the nature of the filtration problem, Roberts Filter can be depended upon for equipment that is reliable in years of service.

INDUSTRIAL WATER RECTIFICATION

Water treatment has long been a specialty of Roberts Filter. Zeolite water softeners are guaranteed to meet all requirements for which recommended, and are available in a wide range of capacities. Roberts water conditioning equipment is widely used to control precisely the desired chemical content of water for industrial use.

SWIMMING POOL RECIRCULATING SYSTEMS

The combination of thoroughly clarified water and efficient recirculation are features for which Roberts pools are famous. Systems for both outdoor and indoor pools are designed and installed by men long experienced in the conditions peculiar to a successful swimming pool installation.

PRESSURE FILTERS

Closed pressure filters have wide usage where gravity filters are not justified. Roberts vertical filters are available in standard types from 12" to 96" diameter; horizontal pressure filters are all 8'0" in diameter and in varying lengths from 10'0" to 25'0".

When you think of good water—think of Roberts Filter

Depend on Cyanamid's ALUM for 6 good reasons

1. It feeds uniformly, without trouble, in solid or liquid form.
2. It has a wide pH range for effective coagulation.
3. It forms floc rapidly.
4. It gives maximum adsorption of suspended and colloidal impurities.
5. It causes minimum corrosion of feeding equipment.
6. It is available in granular form or in the new easy-to-use liquid form.

Write for complete information on Cyanamid's ALUM (Commercial Aluminum Sulfate). Make your next order Cyanamid's ALUM.

Armco Steel Water Pipe Reference Data

In Tuscaloosa, Alabama, this 50-ft. length of Armco Steel Water Pipe is being lifted onto concrete piers.

When you need water supply lines and force mains, here is a handy guide to the advantages of Armco Steel Water Pipe.

METHOD OF MANUFACTURE. Armco Steel Pipe meets AWWA Specifications C-201 and C-203. Continuous spiral seam butt weld is as strong as the pipe itself. Pressure test data is available.

SIZES AND LENGTHS. Exact lengths up to 50 feet. Twenty diameters from 6 to 36 inches; ten wall thicknesses from $\frac{3}{4}$ - to $\frac{1}{2}$ -inch.

COATINGS AND LININGS. Spun coatings and linings and outside protective coatings meet AWWA Specifications C-203 and C-204.

FLOW CAPACITY. C=150 to 160. Spun enamel lining assures continuing high flow capacity.

FITTINGS. Standard and special fittings are prefabricated for quick, easy installation.

END FINISH. Pipe ends can be flanged, beveled for field welding, prepared for Dresser couplings, or otherwise finished to meet your needs.

Write for manual "Design Standards for Steel Water Pipe." Armco Drainage & Metal Products, Inc., Welded Pipe Sales Division, 4544 Curtis Street, Middletown, Ohio. Subsidiary of Armco Steel Corporation.

EAST ORANGE, NEW JERSEY

Water Treatment, too, needs INDIVIDUAL DIAGNOSIS

No two water treatment problems are exactly alike. The right solution to each can only be arrived at after a careful study of the local conditions. Variables such as raw water composition, rate of flow and results required automatically rule out the cure-all approach. The installation shown below is a good example of how equipment should be selected to fit the job . . . and not vice versa.

View of the Fort Lauderdale Fiveash Plant, Dorco Hydro-Treater unit in foreground.
Consulting Engineers: Phipps, Riss & Soarson, Fort Lauderdale, Florida.

Fort Lauderdale FLORIDA

*Uses High-Rate
Water Treatment
to Meet Needs of
Growing Population*

Like every progressive city, in 1952 Fort Lauderdale was faced with expansion of water treatment facilities to meet the needs of its rapidly growing population. Careful analysis indicated that high-rate treatment would be the best answer to their problem.

The result was the new 8MGD Fiveash Water Plant which went into operation in December 1953 and has greatly reduced the load on the Old Dixie Plant. Finished water averages less than 50 ppm hardness with zero color. Treatment consists of aeration, softening, filtration and chlorination with a 55 ft. square Dorco Hydro-Treater mechanism installed for the softening step.

If you'd like more information on the complete line of Dorco-Oliver water treatment equipment, write to Dorco-Oliver Incorporated, Stamford, Connecticut for Bulletin No. 9141.

Every day over 8 1/4 billion gallons of water are treated in Dorco-Oliver equipment
